No, no deadline. So no worries.

Thanks Annie for the update.

Do we have a new deadline for the journal submission?

Sahar

Hi Sahar

We had to revise the simulations for both manuscripts and this is taking some time. Sorry, but this has to be done and was not part of the scheduled plan. We are making up the time as best as possible.

Progress has been made on completing the systematic review for PSLT which was another pacing item.

Both manuscripts will go back to the same editor as a set and will be published as a set.

I will keep you apprized as progress is made and when drafts will be available for final review.

Thanks

Annie

Hi Annie,

Just checking in on the status of the surfactants and PSLT polymer manuscripts. I know the surfactants manuscript was accepted by the journal with minor formatting revisions. Is that one ready to go? Is the plan to get both papers published in the same edition of the journal?

Thanks and hope all is well.

Sahar

Hi Sahar

Oh no need. Already well underway and happy to say it is not the hold up. Finishing the systematic review I think is getting done by next week. Graphics done.
Once I meet with EPA again this week I can summarize.
Sorry for the sporadic communication. We had an unexpected holiday too. THAT was sorely needed.

Annie

Hi Annie,

Hope you are well and Happy Tuesday.

I recognize that you are busy with many priorities. We can help with incorporating the MPPD data into the PSLT paper and you can review. Perhaps we can have a quick call about where you may need our help and I can figure how best to support you.

Thanks, Sahar

Ok, I think those will work well. Thanks for working your graphics magic ☺.

Any updates on the timing for publication? Will both papers be in the same edition of the journal?

Thanks Sahar. No not what we were looking for at all. For one thing, the IATA is more than just the in vitro assays. Secondly, we can't show photos of experiments and we already have graphics of in vitro cell systems. We were looking for representation of the CHEMICALS per se. So for the polymers we have the little icon with the hydrophobic head and chain; for the surfactants the micelle. I think those are probably OK and graphics can work magic. We just thought there might be something that the companies could offer or prefer. Not a biggie.

Hi Annie,

I reached out to Amy Clippinger of PETA to see if she had any suggestions and this was her response. Thoughts?

Are we looking for a general photo for the cover of the entire journal? In the past, we have obtained permission to use photos from Vitrocell and AlveoliX for Special Issue covers and these looked great. What about asking Mark Higuchi or Shaun McCullough at EPA ORD for an in vitro photo from their lab? If not, I'm happy to ask Epithelix, MatTek, or Institute for In Vitro Sciences.

Sahar

Hi Sahar

I'm meeting with my graphics guru here in RTP on Wednesday to start drafting what we need for resubmission. Would it be possible to get any images by 2 pm that day?

Thanks for the help!
Annie
